

SYRUS GADDY

Full-Stack Software Engineer • TS/SCI Clearance

910-308-3896 • gaddys10@gmail.com • github.com/gaddys10 • syrusgaddy.com

SUMMARY

TS/SCI-cleared Full-Stack Engineer with 8+ years of building and deploying secure UIs, RESTful APIs, containerized solutions, and test automation in JavaScript, Python, & Java. Proven track record in DoD and SaaS environments.

- Led DoD crisis web app upgrade; cut communication latency 40%, secured 1-year program extension
- Supported enabling 20+ million fidelity.com users to transfer funds to/from ETFs externally
- Developed device management chatbots; cut Cisco employee laptop support tickets by 18%

SKILLS

Languages: JavaScript, TypeScript, CSS, Java, Python, SQL, C#, PHP

Frontend: Angular.js, React.js, Meteor.js, React Native, Redux, Bootstrap, SASS

Backend: Node, Azure, PostgreSQL, MySQL, Oracle 11g, MongoDB, RESTful API Development, Active Directory, Apache Tomcat, Express, Flask, Kafka, Keycloak, Nest.js, Spring Framework, Vite, JSON, Gradle, Android, iOS, Linux

Testing: Test Automation, Unit Testing, A/B Testing, Cypress, JUnit, Mocha, Playwright, Postman, Selenium

CICD: Agile, Confluence, Docker, Git, GitLab, Jenkins, Jira, Kubernetes, Pipelines, Splunk, Subversion

UI/UX Design: Adobe Photoshop, Adobe XD, BrowserStack, Figma, Storybook Design System

EXPERIENCE

General Dynamics Information Technology

Oct 2024 - Present

Senior Software Engineer

- Developing a full stack React + Node web application with a Python-powered OpenAI Whisper backend to transcribe voice input into structured DoD field reports, streamlining manual reporting time and reducing errors
- Leading 8-member team to develop a role-based entity management web application in Node and React, visualizing DoD objective assets from PostgreSQL for DoD operational planning
- Containerized PostgreSQL, Kafka, Redis, and Elasticsearch environments using Docker Compose and automated pytest flows, enabling consistent local development and raising test coverage
- Configured GitLab pipelines to test and deploy containerized apps on Kubernetes to ensure operation on DoD devices
- Using Figma to create initial and ongoing prototypes for desktop text-to-speech and image-to-text translation software

Cisco Systems

Jan 2023 – Oct 2023

Software Engineer

- Developed Webex chatbot UIs and conversational APIs using JavaScript, Python, botkit, and Nest.js to automate device IT support, onboarding, and returns; cutting employee laptop-related support tickets by 18%
- Unified Mac and Windows chatbot management systems into a single, OS-independent, Dockerized codebase using Python, Kubernetes, Flask, and MySQL, cutting code duplication by 45% and reducing deployment overhead
- Created chatbot management REST APIs & their pytest automated API tests to display integrated device status reports
- Mentored 7-person global team through Agile & Jira processes, increasing sprint velocity by 20% in under 2 months

O'Reilly Auto Parts

Nov 2022 – June 2023

Senior UI/UX Software Developer

- Modernized and simplified usability of 6,000+ retail back office and keyboard-based Point of Sale systems by designing and developing front-end UIs with Adobe XD, CSS, Git, Gradle, Java, JavaFX, Spring Framework, & Tomcat

ARCOS LLC

Oct 2021 – Aug 2022

UX Software Developer

- Built Angular & React Native UIs for mobile/web apps managing utility crews for 141,000+ Connexus Energy clients
- Developed React-based single login solution to integrate newly acquired software authentication with current apps
- Centralized UI components in Storybook design system, removing duplicate styles & boosting velocity 20% in 3 sprints
- Launched custom form builder product development by creating initial Figma and Adobe XD product design prototypes

MAG Aerospace**Mar 2021 – Sept 2021***Software Technical Lead*

- Led a 4-person team to upgrade Meteor.js crisis-management web app including new UIs + real-time messaging, event tracking, and notifications; reducing field communication latency by 35% and securing a 1-year DoD program extension
- Orchestrated integration of React architecture with Hooks into Meteor.js web app to streamline state logic and reduce MongoDB query complexity, improving page rendering speed by 30%
- Developed a PyQGIS heat mapping tool from airborne infrared data to streamline firefighting coordination and reduce overall firefighting effort cost, enabling MAG to offer scalable mapping services to international government clients
- Established web app UI responsiveness with Browserstack manual testing and Cypress test automation to simulate and debug user interactions with MongoDB NoSQL database across browsers
- Directed MongoDB NoSQL database management and JSON data modeling to enable new data visualization features, improve scalability for concurrent users, and improve application integrity via replica sets in case of backend failure
- Led team's product design by creating weekly Figma, Adobe Photoshop, and BrowserStack prototypes to demonstrate product development, capture requirements, and strengthen project documentation
- Secured app deployment by containerizing production & dev environments in Linux VMs with Docker, bash, & VMware

*Software Engineer***Jan 2020 – March 2021**

- Upgraded Meteor.js information portal web app to implement first-ever dashboard customization using responsive, resizable drag-and-drop CSS + Bootstrap widgets saved per user in MongoDB; cutting support tickets by 25%
- Created a JavaScript archival & deletion workflow that flagged dashboard events (Bootstrap/CSS) for DoD-compliant deletion and generated zipped PDF event logs from MongoDB data upon deletion; cutting production overhead by 50%
- Implemented unit tests, automated end-to-end UI test suites, and manual A/B testing with Cypress + BrowserStack to validate app behavior and responsiveness, catching UI errors between Google Chrome, Firefox, & Internet Explorer
- Designed/demonstrated solutions for stakeholders with Figma and Photoshop to gain and share product requirements

Xylem Inc.**Aug 2018 – July 2019***Software Test Engineer*

- Ensured tandem functionality of SmartPoint® radio transceiver firmware & FlexNet® communication protocol with Python test automation scripts, now deployed in Columbus, OH to manage energy use for over 1.2 million residents

Fidelity Investments**Jan 2017 – May 2018***Associate Software Engineer*

- Contributed to TypeScript, Angular, Express, and Node UIs and APIs to enable external fund transfers to & from Fidelity ETF accounts for 20+ million Fidelity.com users and investors, with full SASS styling and Redux state management
- Developed proof of concept product to manage and trade bonds online with JavaScript, Java, SQL, C#, .NET, CSS, JUnit, Oracle 11g relational databases, RESTful APIs, and Spring Framework
- Created test plans + unit & integration automation suites for 5 fidelity.com engineering teams with Selenium, Mocha, Postman, & Chai; catching critical bank transfer bugs and API-based errors including navigation & custom widgets
- Took ownership of Jenkins pipeline testing stages of QA, development, and release servers to provide smoke testing for new features and a consistent 80% minimum test code coverage for scheduled releases

Alpha Kappa Alpha Sorority, Inc.**Sep 2013 – April 2014***Contract Web Developer & Graphic Designer*

- Added recruitment channel for chapter members by developing a HTML, CSS, and JavaScript web app including photo galleries, contact lists, and event calendars while securing members-only areas using a PHP-based IAM login system

PROJECTS

Home Site and Portfolio – syrusgaddy.com**github.com/gaddys10/home-site**

- Node web application hosting resume, mock websites, and UI/UX designs with responsive CSS graphics & animations, Lit components, React state management, Vite bundling, and update deployments via FTP using FileZilla

EDUCATION

Fayetteville State University – Bachelor of Science Computer Science, Mathematics Minor**May 2016**
